Living and Doing Rhythmanalysis

By Henri Lefebvre

I. Doing by Martin Heidegger

I mean a lot of doing, baking cakes and working on architecture, and doing some research in an institute.

II. Living in Doing

Just live a rhythmanalysis in the house and around – I mean walk to the street below, sense the street and walk to the cigarette store and walk in the house as in fact a unique rhythmanalysis of walking and writing works.

I mean live like an architect. I also mean do rhythms which are unique.

I. Walk to the Kitchen and Make Tea
II. Walk to the Balcony
III. Do Some Smoking
